Sex, Drugs, And Cocoa Puffs: A Low Culture Manifesto (Now With A New Middle)

Synopsis

From the kid who brought you Fargo Rock City, the first book in history to garner the praise of Stephen King, David Byrne, Donna Gaines, Sebastian Bach, Jonathan Lethem, and Rivers Cuomo, comes Sex, Drugs, and Cocoa Puffs, the first book in history to examine breakfast cereal, reality television, tribute bands, Internet porn, serial killers, and the Dixie Chicks. Countless writers and artists have spoken for a generation, but no one has done it quite like Chuck Klosterman, with an exhaustive knowledge of popular culture and a seemingly effortless ability to spin brilliant prose out of unlikely subject matter. Whether deconstructing Saved by the Bell episodes or the artistic legacy of Billy Joel, the symbolic importance of The Empire Strikes Back or the Celtics/Lakers rivalry of the 1980s, Chuck will make you think, he'll make you laugh, and he'll drive you insane, usually all at once. Sex, Drugs, and Cocoa Puffs is ostensibly about movies, sports, television, music, books, video games, and kittens but, really, it's about us. All of us. As Klosterman realizes late at night, in the moment before he falls asleep, "In and of itself, nothing really matters. What matters is that nothing is ever 'in and of itself.'"

Glad this was a collection of essays, rather than a novel. I don't think I would have been able to make it through a novel of this type of writing. Also made it easy to read while on the pot. The essays start out with brilliance (especially the first two, about romance and The Sims, respectively), but my interest in them fizzled out. There are a few bright points here and there in the remaining essays (the essay about serial killers and our fascination with them is dead on). There is no doubt

Klosterman is an adept writer, can pinpoint emotions, and locate intermittently with a witty finger the pulse of certain social issues (like what the hell tribute bands are all about and WHY). But the tone in which he does so is sometimes reminiscent of...how shall I put it? A smart-ass thirty-year-old who thinks he is very clever with his observations, and justifies it by saying he is a Gen X'er and entitled to his lofty superiority. In other words, if you read Klosterman, you're just the type of person he'd look down on. In trying to deconstruct pop culture, Klosterman sometimes comes across as believing himself an expert about everything American. He also has no qualms about insulting outright the very audience reading his book. Even though he jokes in the beginning that he writes these things late at night in a state of near-delirium, you still get the impression he thinks he is, as he might put it, the "uber-mensch". Some of the essays are so specialized that I had absolutely no interest in reading them, and skipped right over them as I realized the entire essay was absorbed in deconstructing, say, basketball heroes. So I can't really say I enjoyed the entire book - some of it was unintelligible to me; hence, 3 stars (IMHO).
