Customer Reviews

This book is intended for non-lawyers, which is great because most of us need a basic guide to asset protection. Jeff Matsen is an expert in this field and writes very well. It is pretty short and not as overwhelming as the other books on the topic which intimidate me. He goes into domestic structures and off-shore structures which is good because I feel like there is a lot of debate as to which structures are the most effective. I found a typo on page 75 (thanks, Jeff). You should definitely buy it for your mother on Mother's Day, your father on Father's Day, and your children for their birthdays. I'm kidding, don't buy this book for your family, just read it and then learn how to protect your assets.

This book is a must for anyone who has significant assets or advised people who do. Everyone can benefit from the strategies set forth in the book. There are several demonstratives that that make it easy to conceptualize and understand complex principals. The book does a great job of setting forth ideas to protect wealth in a way that is easy to understand. Excellent!

Excellent book and very well written. Everyone with any assets should at least peruse it as it is full of resourceful information. I would recommend this to anyone interested in the subject matter.

Business owners and professionals concerned with legally protecting their assets might also benefit greatly by reading this book.

The ABA Consumer Guide to Asset Protection is a great resource to your personal financial. It explains in a way that is easy to understand. After reading this I will be preparing paperwork to form an LLC. A must have and I highly recommend this book.
